EVERY PARAMETER · MIDJOURNEY V8.2

Midjourney Cheat Sheet

Add these to the end of any prompt to control how your images come out.

```
a lighthouse in a storm, oil painting --ar 16:9 --s 250 --raw
```

DESCRIBE THE IMAGE FIRST — PARAMETERS LAST: SPACE BEFORE --, NO COMMAS

01 THE LOOK

Stylize — --s --stylize
How much of Midjourney's own artistic flair goes in. Low follows your prompt closely, high gets more artistic.

0-1000 · default 100 — `--s 250`

Chaos — --c --chaos
How different the four images are from each other. Called Variety on the website.

0-100 · default 0 — `--c 30`

Weird — --w --weird
Quirky, offbeat results. Experimental, and it doesn't play well with seeds.

0-3000 · default 0 — `--w 500`

Raw — --raw
Switches off Midjourney's default styling for more literal, photo-like images.

on / off — `portrait --raw`

Experimental — --exp
More detail, more dynamic, more tone-mapped. Works alongside stylize. V7 and V8.

0-100 · default 0 — `--exp 15`

02 SHAPE AND MODEL

Aspect ratio — --ar --aspect
Width to height, in whole numbers. 16:9 for YouTube, 9:16 for Reels and TikTok, 2:3 for prints.

default **1:1** · max 14:1 — `--ar 16:9`

Version — --v --version
Pick the model. V8.2 is the default; 8.1, 7, 6.1, 6 and older still work.

default **8.2** — `--v 7`

Niji — --niji
The anime and illustration model, made with Spellbrush. Niji 7 is the latest.

7 or 6 — `--niji 7`

HD / SD — --hd --sd
V8 resolution. HD is 2048px for 1.3 GPU minutes; SD is 1024px for 0.8. HD max ratio is 4:1.

V8.1, V8.2 — `--hd`

Draft — --draft
Cheap test runs. V8 makes 24 small images for 0.4 GPU minutes (website only); V7 makes 4 at half cost.

V7, V8.1, V8.2 — `--draft`

03 WHAT'S IN IT

No — --no
Leaves things out. Every word counts on its own, so "modern clothing" reads as no modern, no clothing.

any words, commas — `--no text, people`

Tile — --tile
A seamless repeating pattern for fabric and wallpaper. Upscaling breaks the repeat.

on / off — `paisley --tile`

Seed — --seed
Locks the starting noise so you can test one change at a time. 99% identical in V8.

0-4294967295 — `--seed 1234`

Permutations — {a, b}
One prompt, many jobs. Works on parameters too. Up to 4 jobs on Basic, 10 on Standard, 40 on Pro and Mega.

Fast or Turbo — `a {red, blue} car`

Repeat — --r --repeat
Runs the same prompt several times. 2–4 on Basic, 2–10 on Standard, 2–40 on Pro and Mega.

Fast or Turbo — `--r 3`

04 YOUR STYLE

Style reference — --sref
Borrows the look of an image or a style code (colors, medium, lighting), not what's in it.

image, code, random — `--sref random`

Style weight — --sw
How strongly the style reference applies.

0-1000 · default 100 — `--sw 300`

Personalization — --p
Applies your taste profile or a moodboard. Stylize sets how much of it shows.

default or a profile ID — `--p`

Image weight — --iw
How much an image prompt counts against your text. Niji 7 goes up to 2.

0-3 · default 1 — `--iw 2`

Edit model — --edit
Changes an image from written instructions, or mixes up to 4 reference images. Replaces omni and character reference.

V8.1, V8.2 — `show it from behind`

05 VIDEO

`--motion low`	Calm scenes, slow camera. The default.
`--motion high`	Big camera moves. Can get glitchy.
`--raw`	Less flair, more control over the motion.
`--loop`	Ends on the starting frame.
`--end`	Sets a different last frame.
`--bs 1, 2, 4`	Videos per prompt. Default 4.

Clips run 5 seconds. Extend them 4 seconds at a time, up to 21.

06 SPEED AND PRIVACY

`--fast`	Runs this job in Fast mode.
`--relax`	Queues it in Relax mode. Standard plan and up.
`--turbo`	Up to 4x faster for double the fast time. Not in V8.
`--stealth`	Keeps it off the public gallery. Pro and Mega.
`--public`	Shows it in the public gallery.

07 OLDER MODELS ONLY

`--q`	Quality. V7: 1, 2 or 4. V6: 0.5, 1 or 2.
`word::2`	Prompt weights. V6.1 and older.
`--oref --ow`	Omni reference, weight 1–1000. V7.
`--cref --cw`	Character reference, weight 0–100. V6.
`--sv`	Style reference version. V7, default 6.
`--stop`	Stops early, 10–100. V6 and older.

Add the version to use one, like `--v 6.1`.

08 DISCORD COMMANDS

`/imagine`	Makes images from a prompt.
`/describe`	Writes 4 prompts from your image.
`/blend`	Blends images together.
`/settings`	Sets your default model and modes.
`/prefer suffix`	Adds text to the end of every prompt.
